

The Energy Efficient Motorsport Programme

Working with the UK motorsport industry to put energy efficiency at the heart of modern motorsport

EEMS Campaign Partner Charter

As an EEMS Programme Campaign Partner, we support the vision for the development of energy efficient technologies within UK motorsport.

By committing to the EEMS Campaign Partner Initiative we will strive to:

- Demonstrate our active support for the development of energy efficient technologies through our motor sport activities and practices;
- Consider the energy and environmental implications of our business activities and endeavour to reduce the environmental impact of our motorsport activities;
- Embrace appropriate technical research, development and testing projects related to energy efficient technologies;
- Encourage other organisations to collaborate with us in appropriate development projects, where these can be identified;
- Incorporate the Energy Efficient Motorsport message in our promotional material and in our communications with the organisations we work with, where relevant;
- Communicate our energy efficient achievements to our motorsport audience to underline our pro-active stance.
